FREE MACRO PRESET PACK

Lr

New preset added weekly!

Thanks a lot for downloading this free macro preset pack for Lightroom!

INTRODUCTION

This preset pack is a growing collection of Lightroom presets that I use on my macro shots, and now you can too! I add a new preset *weekly* so stay tuned!
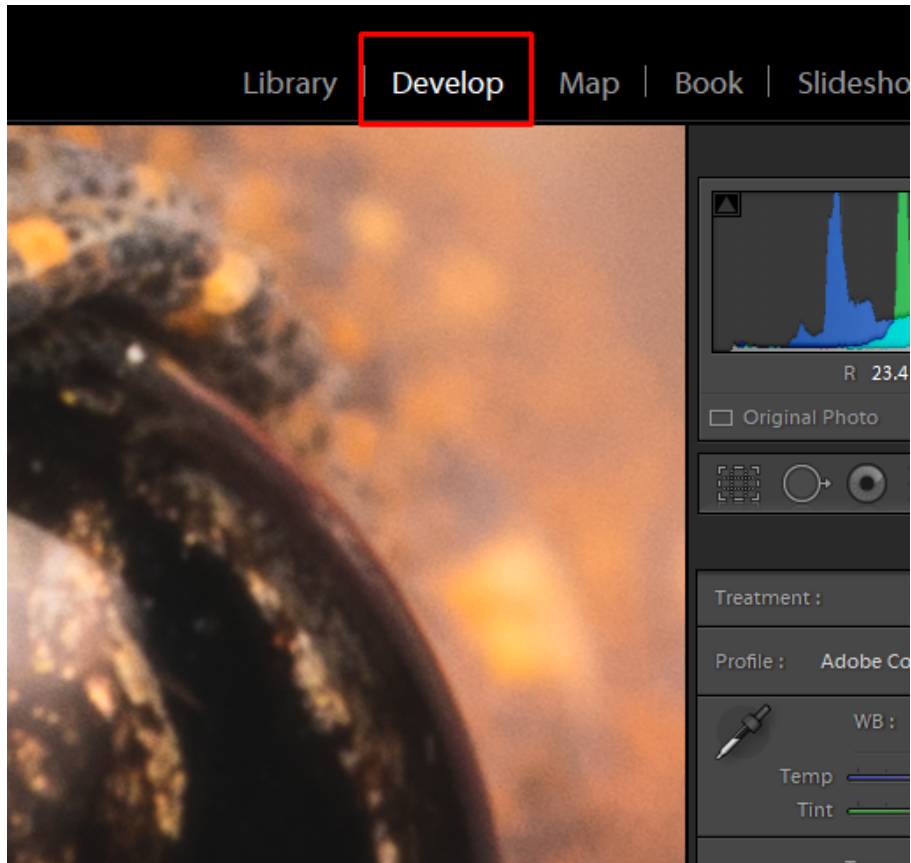

Like most other presets, this one is not a magical preset that will automatically turn your photos into beautiful masterpieces. Instead, this is used as a base for your edits later. It can be used with any other photo type but these work best on a macro photograph.

For best results, it is highly recommended that you take a properly-exposed shot or make an exposure adjustment in Lightroom before applying these presets.
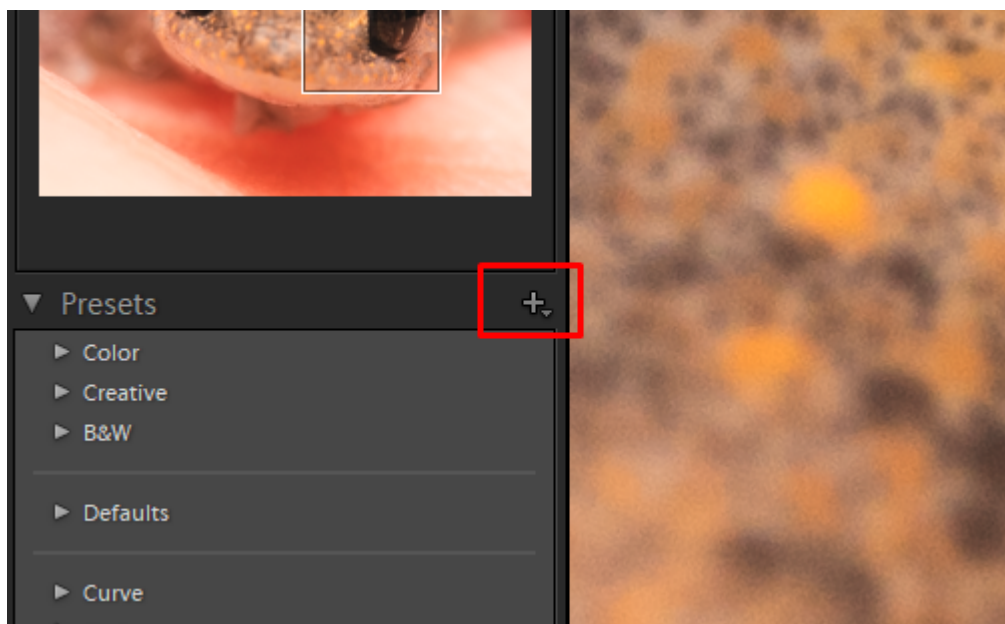

On the next page I've outlined how to install and use this preset pack. Enjoy!
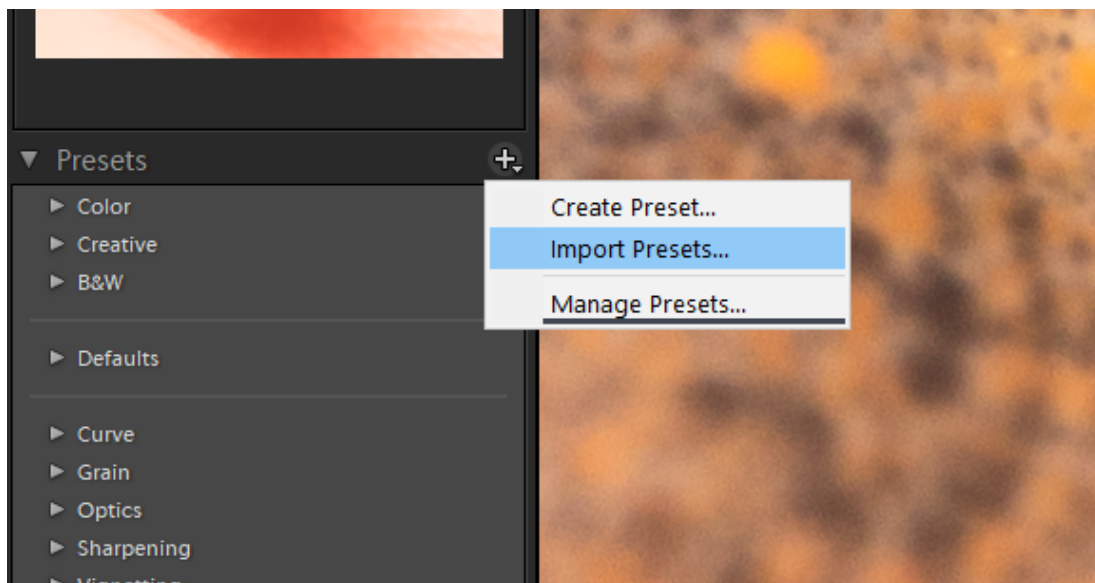

HOW TO INSTALL/USE THE MACRO PRESET PACK

1. With your photo loaded in Lightroom, go to the **Develop** module.

2. On the left-hand side, under **Presets**, click the icon.

3. Select the **Import Presets** option from the drop-down menu.

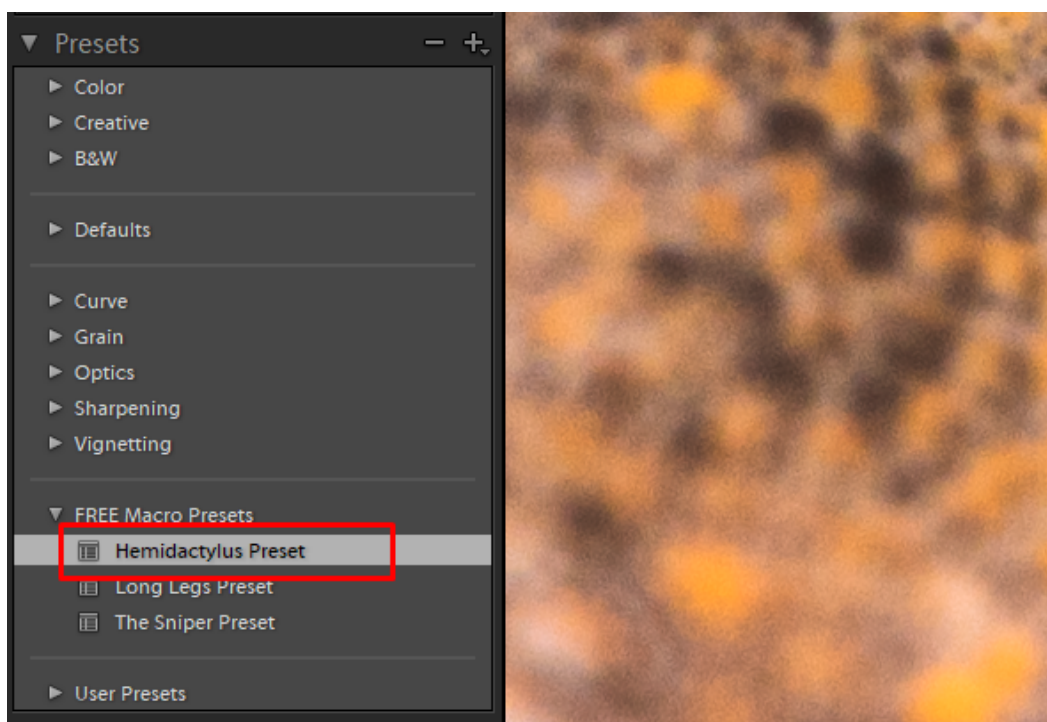

4. Browse to where you've downloaded the preset pack and select the ZIP file.
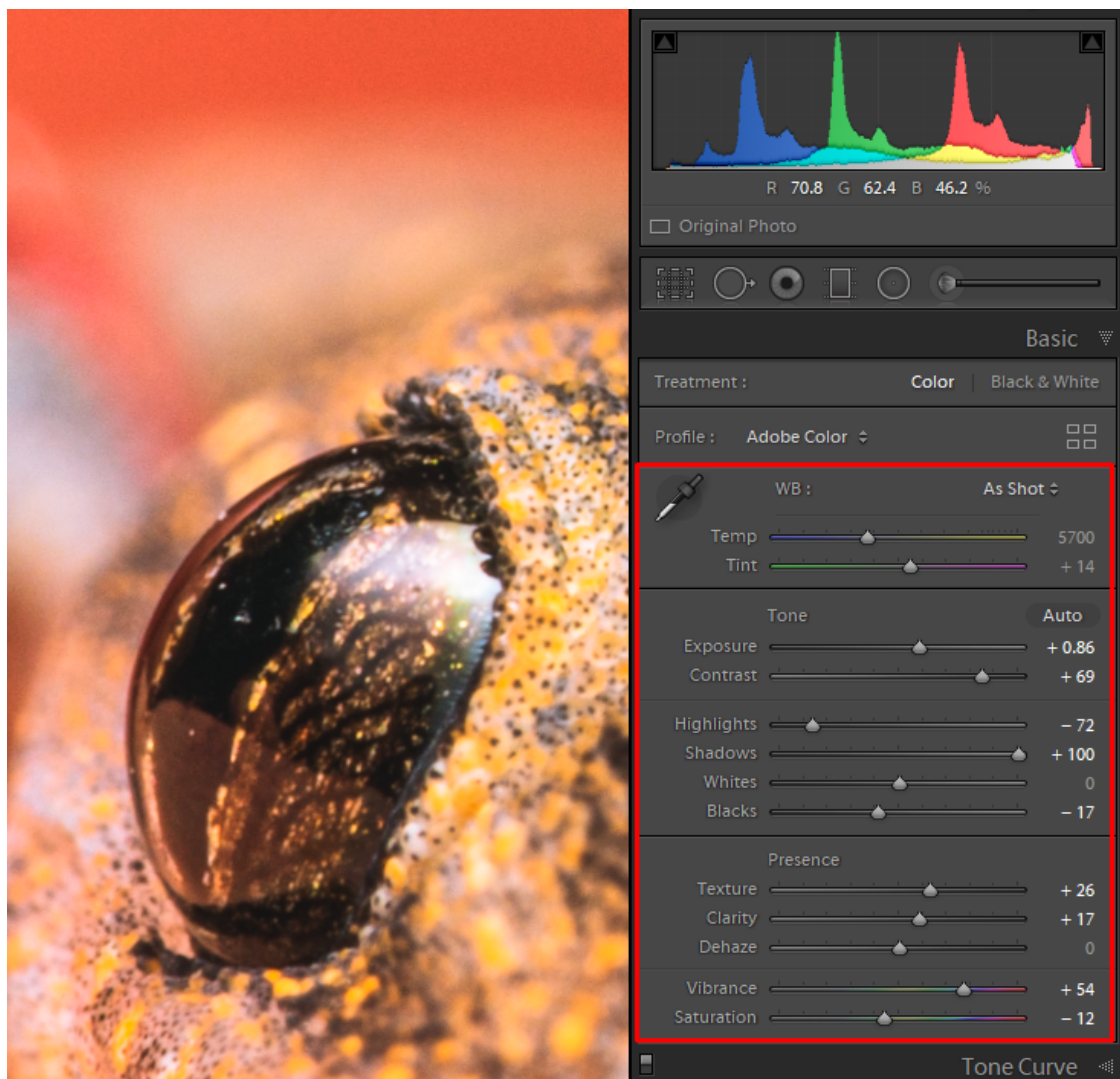

5. Click the Import button on the bottom of the dialog window.

6. From the Presets panel, select the preset name to activate and apply it to your photo.

7. Adjust the settings accordingly and make it your own style!

ON TO YOU

I would love to see what you make with this preset pack! Feel free to get in touch with me at reyn@reynantem.com and show me what you've created/edited. You can also tag me on Instagram [@reynantem](https://instagram.com/reynantem).

If you want to make this world a better place, share and spread the word about this preset pack!

Have fun! :)
